Bill's Ace Hardware

In 1981 our associate company Bill's Ace Hardware had moved from their original 1948 location to a newly constructed building just across the street in Martinez, CA., leaving an empty warehouse type building and three brothers with a list of entrepreneurial ideas to fill it. Being situated in predominately industrial section of the city and having hundreds of hardware customers that needed a way to carry their tools it was a natural transition to open a store that sold just that. Tool Boxes and make them readily available so the contractors didn't have to wait. The customer would be able to see the boxes, choose one and have it installed all in one visit.

We opened Ace Truckbox in 1981. The truck toolbox inventory soon expanded to include Job boxes, Van equipment, cargo racks etc. By 1997 we were packed to the ceiling with inventory, hoping to have just what the customer wanted, when he wanted it. Fortunately the hardware store was about to expand again about a block away, leaving the perfect home for Bill's Ace Truckbox. The building was not only large enough to accommodate the growing business and enormous inventory, but also easily accessible for any type of vehicle or fleet of vehicles. We were now able to boast the largest "in stock" inventory of Weatherguard and Knaack on the West Coast, as well as all of the most popular and specialty brands in the industry. Bill's Ace Truckbox promises superior service and selection. The employees are dedicated, educated in their products and very proud of what they do. We serve local and not so local municipalities and their fleets as well as independent tradesmen and individual truck owners.

If you have special storage needs for your vehicle we've probably got it in stock. If you need a trailer hitch for that new boat, we can install it today. Give us a call at 888-379-0828 or stop by and check us out at 3550 Pacheco Blvd in Martinez , We're sure that you've never seen a store like it!
